This option has proved to be very popular with demand exceeding all expectations. As a result, stocks will shortly be exhausted, possible as early as week commencing 13 August.

New stocks are currently being manufactured overseas however delivery is currently estimated as late October/early November.

Any RTL requests received after the stock outage will be placed on back-order.

Please bear this in mind when making a Service Request. If the equipment is needed immediately, please select an alternative option.

Further updates will be posted once new stock arrives.
